HIGH-TECH DIGITAL DISPLAY SYSTEMS

VIRTUAL & HYBRID EVENTS

IN-HOUSE BROADCAST STUDIO

SEE YOUR BRAND A MILE AWAY

New state-of-the-art digital displays, ranging from the 4,800 square-foot marquee and 3,000 square-foot exterior digital display, to more than 100 digital message boards outside of each meeting room, ballroom and exhibit hall, provides meeting planners with opportunities for advertising, branding, revenue generation and attendee interaction that light up the city and your show.

HIGH-TECH DIGITAL DISPLAY SYSTEMS

TCF Center has an extensive digital signage system that, when added to the full facility fiber optic network, lends one of the most hi-tech event support offerings in the industry today. Looking for new revenue streams, hybrid attendance revenue, advertising and sponsorship opportunities, real time news or event broadcasts from anywhere in the facility? We can make it happen!

VIRTUAL & HYBRID EVENTS

In an ever-changing world, our solutions are completely scalable and flexible, offering everything you need to market, host, stream, and analyze a virtual event within one platform, including RemoteCast which delivers 100% remote presenters, attendees and crews. We can deliver a complete turnkey virtual event for you within eight weeks.

Hybrid events include a live audience with produced staging elements (video, audio, LED, lighting). Presenters, audience and crew are onsite and can include remote viewers and presenters from any location.

IN-HOUSE BROADCAST STUDIO

The broadcast studio at TCF Center is like no other convention center service.

Our studio features include:

- Turnkey broadcast control room with high definition broadcast tools for graphics, video, and lighting
- In-house live and remote presenters, as well as prerecord material
- Capability of hosting in-person presenters, panels, and virtual participants
- Flexibility for live shots, newsroom, green screen, augmented reality and more
- Connectivity between internal fiber network from all points within facility to control room
- Access to outside broadcast fiber and satellite networks
- High-bandwidth internet service for inbound and outbound streaming

HIGH-SPEED FULL-FACILITY FREE WIFI

A robust FREE WiFi system and 10Gb, high-speed internet connection serves users throughout TCF Center, supporting streaming applications and conference voting systems. We employ a team of experienced network engineers and technicians that can design a custom system to meet your specific event needs.
